

# M.VOC IN OPTOMETRY TECHNOLOGY

**Duration :3 Year degree program UGC Approved Course**

## OVERVIEW

The Bachelor's degree in Optometry Technology is a specialized program offering comprehensive education and training in optometry. It aims to prepare students for roles as optometric technicians or assistants. Through hands-on training and clinical experience, students develop practical skills in assisting optometrists with patient examinations, conducting preliminary eye tests, preparing patients for procedures, and managing optical instruments and equipment.

## OBJECTIVES

After completing this course, participants will be able to:

- Perform diagnostic tests and procedures, such as visual acuity testing, retinoscopy, tonometry, autorefractor, perimetry and lensometry.
- Work as optometric technicians or assistants in optometry clinics, eye care centers, optical dispensaries, and ophthalmology practices.
- Assist ophthalmologist in providing comprehensive eye care services to patients, including vision testing, eyeglass and contact lens fittings, and ocular health assessments.

## PEDAGOGY

The pedagogical approach employed is characterized by its holistic nature, emphasizing a focused methodology that underscores the significance of scenario-based practical applications utilizing cutting-edge tools and techniques. There will be comprehensive lab work requiring demonstrated competency to receive a satisfactory grade.

## COURSE HIGHLIGHTS

- Classroom Training (Theory + Practical)
- Internship
- Eligibility 10+2 Science
- BSC in Biochemistry, Biotechnology, Zoology, Microbiology or any other equivalent subjects with a minimum of 50% marks
